#### NEWS OF CITY AND COUNTY CONDENSED

Alex Read, Jr , manager of the lumber interests of the Tyler Company, Montbrook, was registered at the Brown House yesterday.

Mr. and Mrs. A. L. Reeder and children have returned from their old home in Caneyville, Ky, and will make their home here indefinitely. They were here last winter, during which time they made many friends. They became so infatuated with Gainesville and its people that they decided to return and make their home here, and they will be gladly welcomed. They are pleasantly loeated at the Cone cottage, N. Arredondo street.

Among the prominent visitors to this city yesterday was Hon. Fred S. Cubberly, collector of customs of the ports of Cedar Key and Port Inglis, and also a successful lawyer of the Gulf town. Col. Cubberly states that the steamship line between New Orleans, Cedar Key and other points which was inaugurated about eight months ago, continues, and is enjoying a fine business, notwithstanding some opposition. The steamer from New Orleans is expected in Cedar Key today or tomorrow with a large general cargo. Phosphate shipments from Port Inglis are also heavy, the harbor being a scene of great activity.

#### ALL WELL PLEASED.

Pennsylvania Ladies Like Gainesville. May Prolong Visit.

Mrs. T. H. Rosboro and her charming daughter, Miss Nellie, who have been sojourning at the Brown House for the past week, have become very much impressed with the city and its people. These ladies are from Uniontown. Pa., where lots of good, clever people come from, and they are no exception. Possessed with most amiable and entertaining dispositions, they have made many friends here who will be delighted to know that they are so well pleased, and that they are seriously considering remaining here until May 1.

When the ladies arrived here they were accompanied by Mr. Rosboro. who is a prominent citizen and bes ness man of Uniontown. On account of pressing business he was compelled to return to his Northern home, leaving his wife and daughter here.

There are annually quite a little colony of Uniontown people who visit Gainesville, and the influence of these is such that they bring new comers every season. Such friends as Commudore Beall, Dr. Herzog and others of the party are worth many times the value of booklets, since they wield a personal influence which it would be impossible to accomplish by printed matter, however afforing and attrac- LETTUSE MOVEMENT BEGINS

#### The Wages of Sin.

The Park Theatrical Company appeared for the second night of the week's engagement last night, presenting the four-act melo-drama, "The Wages of Sin." The play was well presented, the various characters being naturally impersonated.

This company has become very popular here, and are making themselves more popular at every performance. They are not only good actors, presenting clean, refined plays, but are clever ladies and gentlemen, and will always be welcome here.

This excellent company will give matinee this afternoon at 3 o'clock, presenting "The Old Homestead." Tonight they will present "Niobe." The company is the best that has appeared here this season and deserves the patronage of the public.

An unsuccessful effort to blow the same bank was made two years ago.

#### Bair and Wool.

The microscope shows at a glance the enormous difference between hair and wool. Hairs, like nails, are modifications of the epidermis or skin and are composed of horny cells which have flattened and coalesced and so practically make a comparatively smooth shaft which presents an even surface when magnified hundreds of diameters.

Wool is distinguished from hair by two very important properties. Each fiber of wool is covered with minute overlapping scales, all turned in one direction like the slates on a roof. These are not visible to the eye, but can be felt when the fiber is drawn between the fingers in a direction exactly opposite to the run of the scales.

Another property of wool is its great elasticity, derived from the fact of its set my hand and affixed my official fibers being so finely crimped or curled seal this 4th day of March, A. D. 1905, that they can be drawn to considerable in said Alachua county.

lengths and return to the original state [Official Skal] E. E. Bell.

Justice of the Peace. when the pressure is removed. It is this property which makes woolen fabries so different from cotton or linen. A third important difference is its power of felting or becoming so matted that by rolling, beating and other processes cloth can be made from it without being woven.
